

CBO 5-SEC Connection box

Connection unit for one or two temperature sensor cable SEC15 including an universal connection module UCM.

If it is not possible to connect the sensor cable directly to the sensor control unit SCU800, the connection cable CC15 can connect sensor control unit and sensor cable via the connection box.

In the box the connection cable and the sensor cable are linked together via the connection module UCM.

If short transmission lines are linked the universal connection module has the possibility to activate adaptation resistors.
